

## SCAVENGER HUNT REMINDERS

Students will **meet at Plug In Institute of Contemporary Art at 6:00 pm** on Tuesday, August 4.  
460 Portage Avenue

Bring a digital **camera or a phone** that takes photos. Make sure it is **well-charged** and working on the day of the Scavenger Hunt! As long as the photos are clear, the artistic quality of the image is not important.

On the day of the hunt, students will be given approximately **two hours** to locate and describe **ten examples of Math in Art** in the real world: at Plug In ICA, Ace Art Gallery, and around downtown and the Exchange District.

To prepare for the hunt, think about **the central concepts of the course** and where you might find examples of them in the real world (i.e. frieze patterns on buildings or symmetry on store signs).

For the submission, you will need to drag and drop your images into a **word document** of 10 pages (1 page per example), **save this as a PDF**, and **email the PDF document** to Jaya. Make sure you know how to do this **before** the hunt either by asking someone you know, doing research online, or emailing Jaya with questions. Jaya will provide a template to work from. You will have 24 hours after the hunt to compile this document.

You can bring your **textbook and notes** to help you during the hunt if you like.

Scavenger Hunt will **finish at Ace Art Gallery at 8:00 pm** (no later than 8:30 pm)  
290 McDermot Avenue

If you have any additional questions, please email Jaya.
