Introducing Mathematics LevelUp!

LevelUp is a new comprehensive remediation program developed by the math department and offered to all U of M students through UMLearn.

The course is a self-paced program including instructional videos, exercises, and quizzes that are aimed at getting students up to speed and refreshed on basic mathematical skills. Everything from basic number sense to Trigonometry and Logarithmic functions is covered, and students can self select as little or as many topics as they wish to cover to get them up to the level of whatever mathematics course (or other science course requiring basic math skills) that they need.

Have a look at LevelUp on your UMLearn account and get started today!

Sincerely,
The LevelUp Team
